COBOL Server Admin (Remote)

Description: Cassidy Consulting Group is seeking a COBOL Server Admin (remote). This is a W-2 job opportunity. Please visit our website to learn more about Cassidy Consulting Group – https://www.cassidyconsulting.us.

Position Requirements:

Responsible for all facets of engineering and administering a COBOL Server Express 5.1 or Visual COBOL 8 environments for an Army Data Center Project. This includes architecting infrastructure, installing and configuring operating system configuration in a UNIX environment. Once deployed, responsible for maintaining the infrastructure to meet availability and performance standards. Must have 1-3 years of experience with COBOL server with additional years of IT experience to meet the education/experience level required (above). Specific activities and associated deliverables include support of these COBOL environment, Dev, Training, Staging, Prod and COOP environments; possibly assisting in project releases; configuring and installing the COBOL environment, assisting in troubleshooting of reported outages. Responsible for maintaining security standards in the COBOL environment and ensuring the environment meets Project and ARMY security requirements.

Essential Job Functions:
- Working tasks in ServiceNow for installing, configuring, patching, or troubleshooting Application and Web servers
- Documenting progress on tickets within ServiceNow
- Periodic review of Army Security Technical Implementation Guides (STIGs)
- Documenting common knowledge for future team use in Atlassian Confluence tool
- Consistent review of the literature and current practices to support business requirements and/or new industry technology

Required skills:
- Knowledge of COBOL server and compiler environments
- Knowledge of UNIX administration skills
- Ability to communicate to external customers in a professional manner
- Have a DOD Secret security clearance
- CompTIA Security +
- 1-3 years of experience in COBOL server management with additional years of IT experience to meet the education/experience level required

Desired skills:
- Strong communication skills to communicate systems proposals to management and customers and provide systems diagnoses and resolution for current systems
- Strong organization skills to prioritize work, maintain project schedules and manage tasks to ensure completion of projects within the established schedules
- Good interpersonal skills to interact with customers, senior level personnel, and team members
- Ability to work independently and as part of a global team
- Knowledge of the Cyber Command Security Technical Implementation Guides (STIGs) processes and procedures

Education & Experience: Masters +10yrs, or Bachelors +12rs

Security Clearance: Fully adjudicated DOD Secret, as a minimum

Citizenship: United States

Required Certifications:
CompTIA Security+
Another OS environmental cert within 6 months
